APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed One fifth cubic feet per second. (0.2)

Actual construction work shall begin on or before April 24, 1917.

Proof of commencement of work shall be filed before May 24, 1917.

Work must be prosecuted with reasonable diligence and be completed on or before April 24, 1917.

Application of water to beneficial use shall be made on or before October 24, 1918. Proof of the application of water to beneficial use must be filed with State Engineer on or before November 24, 1918.

Map filed MAR 22 1917

Proof of labor filed MAY 23 1917

Proof of completion of work filed MAY 23 1917

Map filed 6-1-20

Proof of Beneficial use filed July 2, 1920

NOV 4 1969 Cancelled to submit Statutory

Cent. fee Roland D. Westergaard

WITNESS MY HAND AND SEAL this 24th day

of July, 1916.

State Engineer.

This permit is issued subject to all prior rights on the source and is for the flow only after it fails to reach the diversions of all prior rights lower on the stream. Each and every year, after the water ceases to reach all diversions above mentioned, the applicant must give this office, and the owners of the lower diversions, notice at least five days in advance of the time he desires to divert the water, and obtain express permission from the State Engineer to commence diversion under this permit. If any diversion of water is made without complying with the above terms, it will be considered ground for the revocation of this permit, it being understood that such permit could not be issued without invading the rights of others except as above provided. A standard headgate and weir must be installed at or near the point of diversion to facilitate the measurement and control of water. The State reserves the right to regulate the use of the water herein granted at any and all times.

REMARKS:

The waters of Snow Canyon Creek are used under old rights, to irrigate lands lying a considerable distance from the lands herein described. The waters of Snow Canyon Creek are divided upon the premises herein mentioned, by the owner of said waters, and conveyed to them by separate ditches. The length of these ditches and the character of the ground through which the water must flow is such that after the middle of the month of June of every year, these waters do not reach the lands they are supposed to irrigate, but dry up upon Government lands lying between the lands mentioned in this Application, as belonging to the applicant, and the lands belonging to the older appropriators of this water. A considerable stream of water flows through the lands herein described, and is divided as aforesaid, and is allowed to go to waste in the manner described, thereby accruing to the benefit of none.

Applicant does not believe that this is in harmony with the present doctrine of the application of water to the greatest beneficial use. If applicant were allowed to appropriate this water which does not reach other lands, he could apply it to a beneficial use, raise a second crop on the lands described in this application, and which grounds now dry up every year in mid-season.
